

## **HERFF FARMS**

Located at 33 HERFF ROAD in BOERNE, this is an ongoing project that a few of our MG interns have already been involved in. The Inspiration Garden is just that – it shows many different plants and ways of taking care of them. Created with the help of Texas Master Gardeners, local plant experts, and dedicated volunteers, the Inspiration Garden shows others what is possible to grow and thrive in this area of Texas using only organic methods.

They have only just begun the other gardens to grow vegetables for families. All plots are currently sold out for 2017 and are slowly being set up with drip irrigation. They currently have one acre designated for this. They are very organized and helpful but they need hands to get this really growing and to be able to handle all the visitors and children/families.

Project leads will be Chris Snyder and Terry Lashley once they are full MGs. Until then it will be Mickie Cunningham
