

Common Name	Skeleton-Leaf Goldeneye
Botanical Name	<i>Viguiera stenoloba</i>
Other Names	Resin Bush or Golden Bush Daisy
Description	Mound of daisy-like flowers and attractive fine-textured foliage. Exceptionally drought-tolerant plant. Cut spent flowers to keep it tidy and promote more blooming.
Plant Type	Perennial
Plant Size	1.5 – 3' tall x 2 – 3' wide
Light Requirements	Full sun
Water Requirements	Drought tolerant
Soil Requirements	Dry, rocky soils. Limestone-based, Sandy, Sandy Loam, Medium Loam, Clay Loam, Clay, Caliche type. MUST have good drainage.
Evergreen or Deciduous	Semi-evergreen
Native Status	Edwards Plateau, Hill Country and West TX
Pollinators	Bees, butterflies, hummingbirds
Care Notes	Drought tough once established. Dies back in cold winters, but re-emerges from roots. In mild winters, will be evergreen. Cut back to 6" in winter to encourage bushiness.
Texas Superstar	No
